

Medication Assisted Recovery options in Oklahoma

By

Ray Caesar, LADC, LPC

Description of Presentation

This presentation will define Medication Assisted Recovery. Then, time will be dedicated to identifying available MAR treatment options and describing how they operate including strengths and weaknesses.

Objectives

- 1) Have an understanding of the need for Medication Assisted treatment in Oklahoma.
- 2) Understand the operational systems involved with MAR
- 2) Be able to identify all levels of Department contracted sites offering MAR and how to access.

Bio

Ray Caesar has worked in the Substance Use Disorder treatment field for over thirty-five years as a clinician, administrator, educator and consultant. Mr. Caesar has developed and operated multiple programs including inpatient withdrawal management, residential SUD treatment, halfway house, outpatient and crisis stabilization. Work has also been done in the field of prevention. Mr. Caesar received the Oxford House Tom Fellows award, the American Association for the Treatment of Opioid Dependence Nyswander-Dole Award and the OPDPCA Excellence Award.
